Q-PLAN North Greece Ltd

Q-PLAN Building Excellence

HAGRID

Information Society

A GATEWAY TO RESEARCH-SUPPORT SERVICES IN ICT

Q-PLAN Building Excellence

What is HAGRID

- An EU-funded support action under FP6-IST
- The project aims to help / facilitate the participation of newcomers / beginners in the ERA in ICT
- Start date: December 2006; End date: August 2008 (duration: 21 months)
- Consortium of 14 partners from 11 countries

HAGRID

Information Society

HAGRID

Where is HAGRID's main added value?

HAGRID Core Concept

Information Society

'CLIENTS' (i.e. organisations interesting in FP7-ICT)

CAN

✓upload their 'Collaboration Profiles' (to 4 web-DBs) and

✓search for partners (real time - to 8 web-DBs)

THROUGH
HAGRID's 'Single Point Of Access'
(SPOA)

Thus, HAGRID SPOA facilitates networking and partner searches by a*llowing access in the web-DBs of projects supporting participation in EU ICT research*

http://www.hagridproject.net/

PARTNERS
Search for partners!
We are seeking for partners under the following roles *:
Requirement Analysis
Integration
Project Manager
Responsible for Dissemination
Development
Demonstration / Testing / End user
Scientific Coordinator
Responsible for Exploitation / IPR
You can perform your search either by FP7 Objectives or specific research areas
by Partner's expertise
by FP7-ICT Strategic Objectives
We are seeking for partners with expertise in the following ICT-relevant research sub-areas*:
Electronics
Control Systems
Digital Systems
Embedded Systems
Nano Technologies
Optical Systems
Smart Cards
RFID and Smart Tags
Sensors
Cognitive Systems and Robotics
Cognitive Systems
Robotics
Sensor Networks
Human-machine Interfaces
Audio-visual Systems

DRAXIS - one of the leading companies in Environmental Management and GIS applications in Greece

DRAXIS

WHO WE ARE:

DRAXIS was founded in 1998 in Thessaloniki and focuses on providing consulting, development, implementation and management of **Environmental Technologies.** DRAXIS can help local authorities or private organizations in Environmental Management, improvement of natural resource use and effective integration of environmental management issues into the decision making process. Through the combined use of **GIS and IT technologies,** Environmental know how and Environmental Remote Sensing and Database Software Products our clients can achieve substantial improvements in Environmental performance.

COLLABORATION INTERESTS:

DRAXIS is interested in participating in EU projects under FP7 and also in other forms of international co-operations and projects in the research areas listed below.
Potential role: requirements analysis, development and integration activities, demonstration and testing activities.

AREAS FOR R&D COLLABORATION:

The company's current research interest focuses on the following scientific fields.
The company's current research interest focuses on the following scientific fields.

- **Software and Services**
  - Environmental IT consulting
  - Environmental GIS
- **Applied ICT**
  - e-Government on Environment
  - Environmental Benchmarking.

MAIN ACHIEVEMENTS:

- Development of the Greek national network for monitoring of UV radiation
- Development of an IT application (stand alone and web) for the collection of survey data, survey's monitoring, data processing and final statistical results production
- Development of a DB application for monitoring of environmental measurements and frequent reporting for the Greek Public Power Corporation
- Development of an Environmental Benchmarking and Environmental self - assessment application

REFERENCE PROJECTS:

DRAXIS research activities are focusing in environmental impact assessment and the development of relative software and environmental indicators. Indicatively the following projects are mentioned:

Selection of EU Projects

- GREEN DRACHMA I: Promoting Sustainable Developme[illegible] Region of Halkidiki through [illegible] (LIFE-ENV/GR/000245), Greece, 2004-2006
- "Consolidation of [illegible] Technical System" (HELIOS II), 2005.

Selection of Other Projects

- UVNET: development of the Greek National Network for monitoring of UV Radiation, EU MS, 2004-2006.
- Integrated Management System for the water quality monitoring and the optimization of the olive tree cultivation with the use of GIS, in the Prefecture of Kavala (Greece)
- Integrated Environmental and Water Monitoring System with the use of GIS for the optimization of the Environmental Protecion, in the Prefecture of Kilkis (Greece)

WHAT MAKES US A GOOD PARTNER

- Deep knowledge and expertise in **Environmental Matters**
- Know-how and experience in **GIS technologies**
- Know-how and experience in **IT technologies**
- Strong and successful **partnerships** with Academic and Research Institutes
- Outstanding **academic background** of the senior staff
- **Quality Management System** complied with ISO 9001

For further information please look at www.draxis.gr
This profile has been developed under the HAGRID project (www.hagridproject.net)

OTHER INFORMATION:

Name of the research department: DRAXIS Environmental Technology
Organisation type: SME
Country: GREECE
Number of researchers: 6
Number of Employees in total: 8
Working languages: Greek, English

Information Society Technologies

Examples of PR Research Profiles produced under HAGRID

Department of Informatics (Ionian University) – the Humanistic Informatics expert in Greece

WHO WE ARE:

The Department of Informatics operates under the Ionian University and is located in Corfu (GR). Our mission is to cultivate and promote the Science of Computing, focusing on the theory and the applications of Informatics in the areas of **Humanistic Informatics** as well as on the design, development, operation and management of **Information Systems.** This orientation makes the Department unique in Greece. Our staff in accordance with the international trends and requirements covers a wide range of research fields and applications, thus interdisciplinary cooperation and interaction can be realized in order to address [illegible]

COLLABORATION INTERESTS:

The Department [illegible] of the Ionian University is interested in [illegible] EU projects under FP7 and also in other forms of international co-operations and projects in the research areas listed below.
Potential role: coordinator, scientific expert, testbed centre.

AREAS FOR R&D COLLABORATION:

The department's current research interest focuses on the following scientific fields.

- Wireless Mesh Networks
- Natural Language & Speech Processing
- Information Retrieval
- Mathematical Models for Virtual and Augmented Reality
- Pattern Recognition
- Security and Cryptography
- Mobile and Wireless Applications
- eGovernment applications
- Business Modelling

MAIN ACHIEVEMENTS:

- Consulting services on eGovernment issues for the Prefecture of the Ionian Islands.
- Design of the infrastructure and the services offered from a wireless mesh network for the municipality of Corfu.
- A feasibility study examining the viability and value of an advanced security system using biometrical methods for controlling the transportation of persons and vehicles through the Greek-Italian borders.
- Development of a stochastic statistic model illustrating the potential of self-organization for any given population.

REFERENCE PROJECTS:

Indicatively the following projects are mentioned:

Selection of EU Projects

- The **SWEB** project (FP6-IST) is designed to provide a technical infrastructure to enable efficient and secure cross-border eGovernment services in Europe. The project shall test and evaluate mobile services in seven cities and local authorities in the Western Balkan countries as well as in the city of Siena.
- The **MAVITRA** project (Interreg IIB) aims at helping workers' mobility in the Mediterranean Basin, with the creation of a virtual labour market and with the improvement of the national work intermediation services.
- The **PELAGOS** project (Interreg IIIA) aims at developing an advanced security system using biometrical methods for inspecting penetration in certain areas of the Greek-Italian borders.

Selection of Other Projects

- The **DAKOS** project (Programme of the Ionian Perfecture) aims at modelling the potential of self-organization and suppresion of disease affecting olive trees in the real eunicipality of St. George in Corfu.

WHAT MAKES US A GOOD PARTNER

- **Highly qualified** and experienced researchers. All our researchers have PhD degrees.
- **Innovative** and creative **scientific thinking.**
- Successful **participation in national** and **international projects.**
- Provision of **consulting services on ICT issues** to local and national authorities.
- Interest and experience in **conducting interdisciplinary research** in the areas of Humanistic Informatics and Information Systems.
